

## Consultations:

Your initial consultation with me will have four basic parts. The first part will consist of a review of your medical and surgical history; of particular concern will be any current chronic or acute medical problems you may have, their management (how well they are controlled), the medications you are currently taking, your allergy history and any related surgical history. The second part will be your chance to express in detail what you would like to have changed and how you want it changed; i.e. your anticipated outcome. Third will be a discussion focused on the procedure(s) you are requesting and information regarding the procedure(s) will be related to you. Fourth and final will be your physical examination following which specific recommendations will be made. An opinion will be provided stating whether the procedure(s) is/are appropriate for you and whether you are likely to realize the changes you anticipate. If you will likely not realize the changes you anticipate, the anticipated magnitude of change that will occur will be discussed. If appropriate you will be provided with a quotation for the procedure(s) and this will be honored for six months from the date of your consultation.

Effective 01 November 2007 there will be a fee charged for consultations. If you desire consultation for more than one procedure, please let us know so that we may schedule sufficient time to address your concerns.

The consultation fee for Initial and Secondary Consultation will be applied on a one time basis to any surgical procedure you schedule with us, i.e. it will be deducted from the amount you will be quoted at the time of your consultation. The deduction is taken from the balance due prior to operation, this amount may not be used as a credit toward your scheduling fee.
